PROFESSIONAL SUMMARY

Detail-oriented Information Technology graduate with practical experience in Quality Assurance, Web Development, and Game Development. Skilled in manual testing and test case design, with front-end development experience using React.js, Tailwind CSS, and Unity/C#.

WORK EXPERIENCE

Highly Succeed Inc. **Jan – Mar 2026**

Quality Assurance Intern

- Designed manual test cases across multiple client websites, including an alumni engagement platform and a barangay management system, to validate their functionality and track progress over time.
- Conducted manual regression testing on client platforms such as a municipal government and a hospital information system, using documented test cases to catch defects and ensure reliable deployment.
- Annotated native tobacco plant imagery on a custom built website platform, labeling plants by health status to verify AI model accuracy in automated disease detection.

Web Developer Intern

- Coded the front-end features of the alumni engagement platform using React.js and Tailwind CSS, ensuring consistent display across devices.
- Implemented the back-end features of the alumni engagement platform using MongoDB, structuring data storage for user accounts and profile information, enabling reliable account access and management.
- Created manual test cases for the alumni engagement platform, conducting UI testing to identify and resolve issues before release.

FEU TECH Innovation Center **Sept – Dec 2025**

Game Developer Intern

- Developed Tam's Quiz, a 2D game focusing on Design Thinking concepts through interactive gameplay, enhancing the players learning experience.
- Coded gameplay mechanics and game logic using C# and Unity, delivering smooth gameplay.
- Performed functional testing across gameplay to identify and resolve bugs, improving the overall game stability and player experience.

EDUCATION

FEU INSTITUTE OF TECHNOLOGY **2026**

BSIT with Specialization in Animation and Game Development

CERTIFICATIONS AND SKILLS
